SPECIAL

- Only one Activated Blackstone Fortress may be fielded for every FULL 750 points of other ships in a Chaos fleet. No more than three may be taken.
- A Blackstone Fortress cannot go onto special orders but is assumed to automatically pass all other Leadership tests it is required to make.
- The Blackstone Fortress can move up to 10 cm in any direction in the movement phase: it does not turn like a normal ship.
- It has no crew and so does not add a D6 to its boarding score during a boarding action.
- A Blackstone Fortress' warp cannons roll 1 dice per point of Strength and require a 4+ to hit, like a lance. However, all hits will affect a ship directly, and ignores shields, holofields and any other similar mechanisms, such as reactive armour saves, spores, etc. Warp cannons do not ignore any *Brace for impact* saves or any reactive armour modifiers while braced!
- **Super-Mega-Death Shot:** The Blackstone Fortress is capable of channelling its energy into a single shot of extraordinary magnitude if not crippled. To do so, it must build up its energy by not moving or firing its weapons for two turns. In the next turn, it must remain still and immediately fire its weapon in the shooting phase. Trace a straight line 90 cm from the stem of the Blackstone Fortress in any direction desired with the Nova Cannon template. Any ship, friend or foe, that touches the template with its stem (not its base!) takes 8 lance shots, ignoring shields or any similar mechanism (spores, holofields, etc.). Any ship that touches the centre of the template with its stem is immediately destroyed!
 This same shot can also be used in Exterminatus if the Blackstone Fortress reaches the low orbit table, in which case the planet is destroyed on a roll of 2+.
 Multiple Blackstone Fortresses (no more than 3) can combine this shot together if they are all never further apart than the diameter of a Nova Cannon template. The shot centres from the template placed in the middle of the Fortresses and cannot cross the stem of any one Fortress. Every additional Fortress combined in this way increases the range by 90 cm and the number of lance shots on the template by 8. While charging, any ordnance or escorts touching the area between the Fortresses is immediately destroyed. However, capital ships may disrupt the charging process by doing so, taking 8 lance shots for every Fortress charging, that ignore shields and cannot be braced for. If this happens, each Fortress automatically takes D6 hits, cannot move or shoot in the next turn and must recharge again before firing.
