The Carnage class cruisers were designed as fleet support vessels, utilising their long range guns to stand off and provide supporting fire for other ships. It was to be an ill-fated design, marred by the technical difficulties of powering such long-ranged weapons and the cause of much division within the Battlefleet Obscura. The first Carnage class cruiser (*Relentless*) went into battle during the Skalathrax Landing, supporting six transports as they attempted to establish a bridgehead on the contested world. However, as traitor vessels moved in on the convoy, the *Relentless* turned its guns on the transports, destroying three. The remaining transports reached the surface but found that their drop site had been compromised and they were quickly overwhelmed by renegades. Renamed the *Initiate of Skalathrax*, this vessel survived three millennia of blockades and convoy attacks until it was finally destroyed by Imperial agents whilst it was docked at the rebellious stronghold of Darkstation in the Priam Sector. Several other Carnage class cruisers have rebelled against the Imperium, among them the so-called *Anarchic Vendetta*, which was taken over following a mass mutiny of the crew, who left the butchered remains of their officers aboard Station 26/A, violently breaking from dock and causing considerable damage before they were forced to disengage by the intervention of the Apocalypse class battleship *Duke Helbrecht*.
