OPTIONS	• Dragonships equipped with launch bays may take Vampire raiders for +10 points.				

Dragonship is the collective name given to the larger classes of Eldar vessel. The term Dragonship does not refer to any particular armament or configuration, but rather to a variety of vessels adhering to the same basic principles, designed for the same basic roles. Within this larger grouping, individual configurations or combinations of weapons give individual classes their proper name – always a variation on the phrase ‘Dragon’, representing different aspects of the creature of the same name from Eldar myth. Those Dragonships which are piloted in large part, or even exclusively, by spirit stones, for example, are referred to as Ghostdragons, while larger vessels which have been designed to operate away from the craftworld for great lengths of time are often referred to as Void Dragons. Different styles of Dragonship can vary greatly, with different numbers of sails, different armaments and even variations in size.
