

TYPE/HITS	SPEED	TURNS	SHIELDS	ARMOUR	TURRETS
Escort/1	15 cm	45°	1	5+	1
SPECIAL The controlling player can detonate a fire ship at any point in its movement phase, inflicting D3 Fire critical hits on every ship within 3D6 cm. As with any escort suffering a critical hit, escorts within the fire ship's blast will be automatically destroyed, as are any Ordnance markers. Remove the detonated fire ship and put a Blast marker in its place.					

Fire ship is the name given to a variety of de-commissioned warships, merchant transports and other old vessels which have been packed full of unstable plasma and incendiary explosives. They are guided into the enemy fleet by a skeleton crew, who sets the ship to explode and then evacuate in escape pods - although there were several incidences of fire ship crews staying with their vessel to the end to ensure that they caused as much damage as possible. The massive explosion caused by a fire ship detonation will pass through a ship's shields and can cause horrendous damage to the structure of a vessel caught within its blast. Fire ships were first used in the Gothic War by Commodore Kurtz during the defence of Delos, where the Unforgivable was crippled by the simultaneous blasts of two fire ships as it closed with Delos IV.
