				All round	

Defence lasers are massive high-energy weapons similar to a ship's lances. Built around a powerful plasma reactor, a defence laser platform is armed with several of these large cannons, giving it the ability to direct fire in every direction. Defence laser platforms are particularly effective at destroying fast-moving escorts sent ahead of the main fleet to clear away any defences and they contributed greatly to breaking up the Chaos attacks on Orar and Elysium during the opening stages of the Gothic War.
