During peacetime, orbital docks are loading and unloading points for an interstellar transport's lighters and boats, transferring incoming goods and passengers down to the planet's surface and relaying outgoing cargo to ships due to leave. If the system is attacked, the orbital dock's extensive facilities can be turned to preparing and launching military craft to fight off the enemy. Orbital docks also have construction and repair facilities for smaller ships, but lack the specialised workshops required to build and re-supply warships.
