				All round	

An orbital weapons platform normally mounts several laser batteries capable of striking at the enemy before they get too close to the planet. Many orbital batteries are manned by Imperial Navy personnel, although some are built and crewed at the expense of the planetary Imperial Commander. The most sophisticated orbital platforms, such as those found protecting Port Maw and the Adeptus Mechanicus forge worlds, have no crew at all and use complex logic engines to detect and fire at vessels which do not broadcast the correct identification codes.
