

HIGH ORBIT DEFENCES

RAMILIES CLASS STAR FORT

875 PTS

TYPE/HITS	SPEED	TURNS	SHIELDS	ARMOUR	TURRETS
Defence/12 (quadrant)	0 cm	0°	4 (quadrant)	5+	4 (quadrant)
ARMAMENT		RANGE/SPEED		FIREPOWER/STR	FIRE ARC
QUADRANT WEAPONS					
Weapons battery		60 cm		12	Quadrant
Lance battery		60 cm		5	Quadrant
Launch bays		Fighters: 30 cm Bombers: 20 cm		4 squadrons	–
BASILICA WEAPONS					
Weapons battery		45 cm		4	All round
Torpedo silos		30 cm		9	All round

SPECIAL

- **Availability:** The Ramilies is available to Imperial and Chaos Fleets, subject to the rules below.
- **Deployment & Scenarios:** A Ramilies can be deployed as an orbital defence or, in appropriate scenarios such as Planetary Assault, Exterminatus, Surprise Attack, or Hunter, Prey as a replacement for a planet. In such scenarios orbital defences may be sited within 30 cm of a Ramilies class star fort. A Ramilies is bought from the fleet's points, rather than defences to represent its rarity and importance. Ramilies may only be used by prior agreement in competitive games (it's unlikely to be ambushing you in the middle of a fleet engagement after all), but can prove to be a good 'surprising find' for players in Umpired scenarios.

The Ramilies class star fort has formed a vital lynch pin in Imperial strategy since the earliest days of the Great Crusade. It was designed, according to Mechanicus legends, by the hitherto unknown Artisan Magos Lian Ramilies from STC materials captured in the purgation of the 'Stone World', Ulthanx. The Hyper-plasmatic energy conduction system used by the Ramilies is barely understood by the Techpriests in current times, but thanks to the STC system it is still reproducible and has guaranteed endurance of over 3,000 years. The greatest advantage of the Ramilies by far is that its powerful generators can erect a warp-bubble over the entire structure enabling it, with the aid of seventeen navigators and an attendant fleet of tugs, supply ships, warships and system craft, to enter the Warp and be towed to different star systems.

This operation, always perilous, has resulted in the loss of over twelve hundred Ramilies stars forts in their ten millennia of service to the Emperor. However each journey has shortened Imperial campaigns by years at a time by allowing the Imperial fleet to move repair, command and resupply facilities right up to the front line, saving its ship's lengthy return trips to temporary supply bases or full repair dock facilities far behind the warzone.
