The Armageddon class was developed in an attempt to rapidly increase the number of available battlecruisers. Almost without exception, Armageddon class ships are built from the recovered hulls of crippled Lunar class vessels, making them one of the easiest battlecruisers to construct, though many fleet commanders have proved unwilling to sacrifice large numbers of their main front-line cruiser. The very first example to depart the extensive St. Jowen's Dock was the *Ex Cathedra*. Originally named the *Orion* as a Lunar class, the ship suffered heavily whilst engaging Chaos raiders above the world of Pyran and, as it limped back to the Armageddon system, the decision was made not only to repair the venerable vessel, but to upgrade it to battlecruiser standards.

Power relays were re-routed from the ship's main plasma reactors to provide a substantial increase in efficiency for the existing weapons batteries, whilst long-ranged lance turret arrays were built upon a modified dorsal spine. This alone gave the ship a much greater punch at medium ranges and the ability to engage at distance. An immediate drawback became obvious as nearly three and a half thousand extra crewmen had to be drafted in simply to man the additional weapons and to maintain the short-lived relays that powered them.
