Defence/10	10 cm	Special	2	5+	3		
ARMAMENT		RANGE/SPEED		FIREPOWER/STR		FIRE ARC	
Weapons battery		30 cm		12		All round	
SPECIAL • Kroot Warspheres have powerful engines firing in all direction, and this, coupled with the unique, spherical designs of their ships means no command check is needed for <i>All Ahead Full</i> special orders. • During planetary assaults, Kroot Warspheres cannot return to flight during a battle once they have landed. However, they are not destroyed and only count as disengaged for purposes of victory points. • The Kroot approach spacefaring with an innate sense bereft of the technological advances so keenly sought by other races. When the Damocles Crusade revealed shortcomings in the Warsphere compared to Imperial starships, the Kroot adapted simply by constructing larger Warspheres.							
OPTIONS • A Kroot Warsphere may add 2HP and 2 firepower for +20 points (up to three times). • A Kroot Warsphere may subtract 2HP and 2 firepower for -20 points (up to two times). • Warspheres 10HP or greater may also add +1 shield for +10 points. • Warspheres 10HP or greater may +1 turret strength for +10 points. • A Kroot Warsphere 10HP or greater can extend the range of its weapons battery by +15cm for +25 points.							

Unlike the Tau, the Kroot are capable of true warp travel but the exact method has been kept secret from their employers. To the Kroot, warp travel is almost migratory and they seem incapable of navigating anywhere other than systems with habitable worlds. It appears they are drawn to functioning eco-systems

The famous Kroot Warspheres are self-contained towns wherein is kept the retained knowledge of Kroot technology and the choicest items they have received as payment for their services. As such they do not risk them in battle willingly and try to avoid direct action against warships unless the need is great or they are being exceptionally well rewarded.

Warspheres have a single drive running through their core from north to south pole and manoeuvring thrusters along their equator. These engines are reliable but very basic making Warspheres very slow. They are powerful enough to allow the Warsphere to land and take-off from a planet although the process is not elegant. When dirtside the manoeuvring thrusters will normally be used to bury the Warsphere.
