Lightning arc		30 cm		20	
Star pulse generator		20 cm		1 per enemy	
Gauss particle whip		45 cm		6	
Portal		10 cm		3	
OPTIONS					
A single tombship may be upgraded to carry a Sepulchre for +50 points. There is no requirement for a Necron fleet to include a Sepulchre and it is actually quite normal for them to consist of Scythes supported by Jackals.					

Tombships are the largest Necron ships yet encountered by the Imperium. Tombships are large and terrifyingly well-armed craft, perfectly capable of defeating any Imperial battleship currently in service. Fortunately for the Necrons' enemies, Tombships are by no means always present in a Necron raiding fleet, and so far have only been met on seven occasions. In each case the tombship was part of a large force, and so far no tombship has been met that was not escorted by multiple Scythe class harvest ships. All of the Tombships so far encountered have been of the same general pattern, at least as far as can be ascertained from the reports of the engaging Imperial ships. Whether there are different or larger classes of tombship so far remains a mystery, though one account of an engagement between an Ork fleet and the Necrons mentions a ship so big that it dwarfed an Ork space hulk. Whether this is true or simply typical Orkish exaggeration remains to be seen.
