TYPE/HITS	SPEED	TURNS	SHIELDS	ARMOUR	TURRETS
Escort/1	50 cm	90°	6+ save	6+	1
ARMAMENT		RANGE/SPEED	FIREPOWER/STR		FIRE ARC
Lightning arc		30 cm	3		Front

The Dirge class raider is the smaller of the two escort sized Necron ships, and appears to be somewhat rarer. Whether this is universally the case or simply a matter of chance is unknown.

Dirge class raiders, although never formally identified at the time, are now believed to account for many of the vessels occasionally sighted by Imperial Explorators even before the Yuctan incident and the first known Necron harvest. In 692.M41 an impenetrable layer of unidentified metal was found several hundred metres beneath the surface of Angelis, later to be revealed as some form of alien spacecraft when the vessel rose entirely out of the sand and departed without trace. In the light of later events, it would seem probable that the ‘*Angelis Boat*’ was in fact a Dirge class raider.
