Necron fleets have so far always included numbers of smaller ships roughly equivalent to Imperial escort vessels. Although there have been two instances of such craft operating on their own, this seems to be the exception rather than the rule, and it appears that they are usually very closely controlled by the tombships or harvest ships in the fleet. The Jackal is the slightly larger of the two types of escort so far encountered, and has been present in every Necron fleet so far engaged by Imperial forces.

Known encounters:

796.M41 Adinbur Prime: Ambush on Patrol Group Tiryns, Battlefleet Artemis reinforced successfully.

998.M41 Mars: Vessels provided diversionary targets at edge of Sol system – substantial attack ensued.
