More extreme than even the Onslaught, the Ork gunships known as Savages mount only short-ranged forward heavy gun batteries. There has been speculation as to whether Savages are simple refits of Onslaughts, or vice versa. The Ork race are masters of crude improvisation and salvage, so both ideas probably hold true. In open battle, Savages are less of a threat than the longer ranged Onslaughts, as they can be outmanoeuvred and destroyed from a distance. But in an ambush situation, where Orks are lurking in wait amongst asteroids or debris, Savages make for a highly dangerous foe, with their ability to storm forward and smother an opposing vessel with heavy fire.
