SPECIAL • The Fra'al utilize a complex targeting matrix that greatly improves the accuracy of their weapon batteries at long range. They treat all targets less than 30 cm as closing and do not suffer a column shift for firing at targets greater than 30 cm. • Fra'al battleships cannot use <i>Come To New Heading</i> special orders. • When taken in a pirate fleet list, they may not use any fleet re-rolls, and they will attempt to disengage when crippled (+1 Ld bonus when doing so).							
OPTIONS • The Fra'al are exceedingly xenophobic and will not lightly countenance risking their few capital ships in an alliance with any race. While they may well each be accompanied by a squadron of their escorts in larger raids, they can just as well operate singly or in pairs. Using only the profile above, they may be used as a substitution for an enemy in any scenario where the chosen or randomly selected threat is a ship worth up to 250 points. • Up to two ships in a pirate fleet may be Fra'al battleships, rolling for leadership normally and counting as cruisers against the fleet list.
