SPECIAL	A large number of Il'Porru vessels were equipped with specialized gravitic hooks for supporting Kir'la "Warden" gunships so that it may have a form of escort on long-range emissary missions. These gravitic hooks are specially designed for Wardens and cannot be used to tow or count for any other kind of escort.
OPTIONS	Emissary class cruisers can be equipped with a deflector that raises its prow armour to 6+ for +10 points. This is disabled whenever the vessel suffers a prow critical hit (repairable normally).

Unlike the other hull designs resulting from the Kor'or'vesh initiative, the Il'Porru "Emissary" cruiser is primarily intended as a diplomatic vessel. This provides it the necessary mix of firepower and manoeuvrability to make it a suitable conveyance to transport Por Caste dignitaries, Tau commanders and Etheicals in relative safety. By design, it is also capable of seeing off all but the most powerful adversaries of a similar class it may encounter.

As the first capital ship to be produced under the Kor'or'vesh, there are significant numbers of these vessels operating throughout Tau space in a variety of tasks. As befits its nature, it is the vessel with which the Tau perform long range exploration and "first contact" missions. It is often sent to rove far beyond Tau space on diplomatic assignments to the Tau's neighbors or in accompaniment of merchant transports, in this capacity it has most proven its worth to the Tau Empire.

While it may not be a front-line combat vessel, it is well suited to the fires of war, and during the latter stages of the Taros Campaign, a squadron of these vessels successfully boarded an Imperial battleship.
