SPECIAL - You may not have more Orcas than the gravitic hook capacity of the fleet. Each Orca costs 25 points as much of their cost is included in the value of the parent ship. - Orcas are transported to battle on gravitic hooks. However, this has no effect in game terms – Orcas do not start a game attached to their parent ship, and can never be docked during a game. Likewise, the number of gravitic hooks is unimportant when calculating victory points (your opponent does not get VPs for surviving orcas just because there aren't enough gravitic hooks to notionally transport them to safety).							

The Orca was designed to provide the Tau fleet with an escort. Unable to build a drive light enough to produce a normal escort the Orca is transported within a capital ships gravitic sheath. Once unleashed however it is a powerful gunship able to contend with any Imperial or Ork class.
