

TYRANID CRUISER

BASE: 80 PTS

TYPE/HITS	SPEED	TURNS	SHIELDS	ARMOUR	SPORES
Cruiser/6	20 cm	45°	–	5+	2
ARMAMENT		RANGE/SPEED		FIREPOWER/STR	FIRE ARC
Choose one prow weapon for the point cost listed below:					
Pyro-acid battery	30 cm		8	Left/front/right	
Feeder tentacles	Contact		Special	Front	
Massive claws	Contact		Special	Front	
Boarding torpedoes	15 cm		4	Front	
Choose one thorax weapon for the point cost listed below:					
Feeder tentacles	Contact		Special	Front	
Massive claws	Contact		Special	Front	
Boarding torpedoes	15 cm		4	Front	
Choose up to two port/starboard weapon sets for the point cost listed below:					
Port Pyro-acid battery	30 cm		4	Left	
Starboard Pyro-acid battery	30 cm		4	Right	
Port Bio-plasma discharge	15 cm		2	Left	
Starboard Bio-plasma discharge	15 cm		2	Right	
SPECIAL	• Prow and thorax torpedoes cannot be combined into a single salvo, they must be launched separately.				
OPTIONS	• Choose one prow weapon: Pyro-acid battery for +20 pts; Feeder tentacles for +10 pts; Massive claws for +5 pts; Boarding torpedoes for +10 pts • Choose one thorax weapon: Feeder tentacles for +10 pts; Massive claws for +5 pts; Boarding torpedoes for +10 pts • Choose up to two port/starboard weapons: Pyro-acid battery for +15 pts; Bio-plasma discharge for +20 pts				

Tyranid cruiser class vessels represent a mixture of immature hive ships and overgrown escort drones. They are aggressive in their attacks, storming out from the hive fleet in response to any threat to the massive hive ships, often using claws and tentacles to make direct attacks on ships in an effort to physically smash them to pieces. Cruiser sized Tyranid bio-ships are seldom found far from the hive ship, however, and it has been theorised that they receive their nourishment from them in some manner. Tyranid cruisers are arguably the greatest threat within the Tyranid fleet, since they are themselves massive and well-armed, whilst not being

FLEET LISTS Hive Fleet List (pg. 410)

relied upon as a synapse creature. This allows cruisers to attack far more aggressively than hive-ships, since their loss will not greatly endanger associated elements of the fleet. As with most Tyranids vessels, however, their threat is only really effective at close range.
