Space hulks are gigantic agglomerations of ancient wrecked ships, asteroids, ice and other such flotsam and jetsam that are cast together after millennia of drifting in and out of warp space. How and why space hulks appear from the Warp and are then drawn back to it is unknown, although there is plentiful evidence for some being controlled or navigated by their inhabitants or some external force. While Tyranid Genestealers are known for using Space Hulks to transit across the stars as a vanguard seeking habitable worlds for the Hive Mind, most are simply empty ghost ships, plying the void for eternity. Tales of greedy scavengers meeting horrible fates aboard space hulks are told throughout the Imperium, but there are just as many tales of vast fortunes made from the ancient technology they carry.
