Prow weapons battery		30 cm	5		Front

The Aconite class frigate utilises the best Eldar laser technology, giving it a powerful punch which far surpasses that expected of a vessel this size. Usually operating in squadrons of three or four ships, they can level a fusillade of fire which can match the broadside batteries of a battleship – and then slip away before the enemy can fire back. In particular, Aconites often use their great manoeuvrability to get behind a larger vessel where it cannot return fire. If enemy escorts change course to drive the Aconites off, they can quickly move away from danger and attack elsewhere. This tactic was employed regularly over the course of the Gothic War, and was responsible for the loss of at least three Imperial capital ships and several Chaos vessels, including the *Unholy Dominion*.
