Keel torpedoes		30 cm		2	
Prow weapons battery		30 cm		1	

The greatest strength of the Nightshade class destroyer is its ability to deploy ordnance at close range and then swiftly elude retribution. Eldar torpedoes have highly sensitive target acquisition and final approach control systems and are also often armed with highly volatile neutron or vortex warheads. The Adeptus Mechanicus have theorised that this makes them almost twice as likely to inflict damage on an opposing ship as standard Imperial plasma torpedoes. When this considerable armament is placed on a rapidly moving vessel, such as the Nightshade, then you have a weapon that can strike at virtually any target at will. This was amply demonstrated during the Eldar attack on Naxos, when the Chaos battleship *Damnation's Fury* was crippled by three successive torpedo runs from a three-strong Nightshade squadron, despite the protection of several other capital ships and escort vessels.
