SPECIAL		- Though Eldar transports are like their other starships in that they are crewed by those who have elected the Path of the Mariner, these ships are generally led by Craftmasters that are less experienced than those who pilot true warships and thus suffer a -1 modifier against the Eldar leadership table. - Eldar transports are reserved for scenarios that require transports, for which they have the value of a full transport or two assault points.			

Eldar craftworlds are largely self-sufficient, and travel through the Webway obviates the need for a large fleet of dedicated transport vessels. However, such conveyance is nonetheless required for quickly transiting supplies and personnel to Eldar Haven Spires, and occasionally to contested worlds without ready access to a webway portal of sufficient size.

While it is exceedingly rare that the Eldar would stoop toward open trade with the mon-keigh besides the occasional Rogue Trader, it is not too uncommon for them to use these vessels to effect trade with other, more august races, or with those they determine would be advantageous to their own mysterious ends.

Occasionally, small groups of these vessels will ply the stellar main under escort by a contingent of warships, though like everything else about the Eldar, these are usually for reasons much more inscrutable than appearances may indicate. Nonetheless, they are not immune to the predations of the galaxy, and the Dark Eldar in particular consider such vessels a particularly battle-worthy prize.
