SPECIAL	• Endeavour light cruisers get a +1 to their dice roll when defending against a boarding action, because the mid-ship corridor is easy to defend and restricts access to vital parts of the ship.				
	• May increase the prow armour to 6+ for no additional cost. However, if this option is taken, the turning radius of these vessels is reduced to 45 degrees.				

The Endeavour class, lacking the speed for anti-pirate operations, is preferred as a convoy flagship or a heavy escort to larger capital ships of the line. Its heavy gun batteries can almost match the firepower of larger cruisers and it is capable of holding its own in the midst of a pitched battle. Many Endeavour class light cruisers were sent to the Armageddon fleet during the latest Ork invasion, where, during fighting against Ork vessels, the Endeavour's relative slow speed for its class was not found to be a hindrance. The Endeavour, and its sister vessels, became a stable of the Armageddon fleet as replacements for lost ships.
