The Lunar class cruiser forms the mainstay of Battlefleet Obscuras with over six hundred ships serving throughout the Segmentum and more than twenty ships fighting in the Gothic war. The uncomplicated design of this class ensures its enduring utility, enabling vessels to be built at hive and industrial worlds normally unable to muster the expertise to construct a capital ship. Perhaps the most remarkable example of this is the *Lord Daros*, constructed at the feral world of Unloth. The primitive tribesmen dwelling there were influenced to mine and smelt metals which were then presented for 'sacrifice' at sky temples established by the Planetary Lord. The raw materials were then lifted into orbit at each vernal equinox. After a period of eleven years the tribes were rewarded for their effort with the sight of a bright new star moving across the heavens as the *Lord Daros* boosted out-system to join Battlefleet Obscuras.
