

SHROUD CLASS LIGHT CRUISER

TYPE/HITS	SPEED	TURNS	SHIELDS	ARMOUR	TURRETS
Cruiser/4	30 cm	45°	5+ save	6+	1
ARMAMENT		RANGE/SPEED	FIREPOWER/STR		FIRE ARC
Lightning arc		30 cm	10		Left/front/right
SPECIAL - The Shroud is an especially stealthy vessel. Its hull is a further refinement of the normal Necron design, which is even harder to detect. As long as it is not crippled a Shroud will never activate orbital mines or grant the enemy bonuses to their Command checks if it is on special orders. - The Shroud's superior sensors are capable of relaying information gleaned to the rest of the fleet. If a Necron fleet has any uncrippled Shrouds on the battlefield the whole fleet will get an extra +1 to their Command checks when any enemy vessel is on special orders.					

The Shroud class was first recorded in 992.M41 during an engagement with Battlefleet Pacificus. In the six years immediately after, vessels of this configuration were observed on three occasions and each time disengaged before Imperial vessels could bring them under fire. It was believed that either the class or the crew was being tested in some way. Any preparation ended in 998.M41 when five Shrouds launched a suicidal assault on the Adeptus Mechanicus' Mars installation.

Since the Mars gambit, Shrouds have been identified on six occasions acting as the long-range eyes and ears of the Necron fleet. They excel at their job because no Imperial ship with any chance of catching a Shroud could possibly defeat one if they actually caught it. They pose a grave threat to Imperial Navy installations. If they can penetrate the defences of Mars with such ease then there is no base which can be considered safe.

Known encounters:

992.M41 Various: Multiple contacts with Pacificus Patrol Fleets.

996.M41 Bora Culpa Incident: Non-combative observation only.

998.M41 Mars: Targets destroyed but hulks unrecovered.
