SPECIAL • When Leadership values are generated for the Ork fleet, <i>Kroolboy</i> can opt to swap Leadership ratings with a Kill Kroozer or Terror Ship to represent the warlord dragooning the best crew in the fleet aboard his vessel. • Due to its poorly distributed mass <i>Kroolboy</i> may not use <i>Come to New Heading</i> special orders. • <i>Kroolboy</i> is equipped with powerful ‘Soopa Enginez’ and may roll 4D6 when making an <i>All Ahead Full</i> special order, as opposed to the 2D6 normally rolled by Ork vessels.					
OPTIONS • May be equipped with torpedo bommas for +40 pts.					

Kroolboy had a long history of tormenting Armageddon well before Ghazghkull’s monstrous onslaught of the Third Armageddon War, having been observed on frequent pirate raids around the fringes of the system. Whether by accident or design, this familiarity with *Kroolboy* caused monitor station Mannheim to pay less than adequate attention to the vessel’s later raids, assuming them to be typical piracy, when in fact it was at the head of the coming Waaagh! By the time reports of invasion filtered through from other monitoring stations, the commanders of Mannheim station had already paid the cost for their apathy.

As the Waaagh! receded from Armageddon following Ghazghkull’s apparent departure from the planet, *Kroolboy* again returned to piracy in many systems across the Armageddon sector, most recently having become involved in the civil war on Monglor.
