OPTIONS May be equipped with torpedo bommas for +40 pts.					

Like many large Ork vessels, the *Slamblasta* has been identified as having been constructed in the large part from the wreckage of crippled Imperial vessels – in *Slamblasta's* case, the Imperial Gothic class cruiser *Pallas Imperious*. Unable to properly regulate the massive energy circuitry required to power the Gothic class' broadside lance batteries, the Meks who constructed the *Slamblasta* instead pillaged the systems in an attempt to build two much larger lance type weapons. Ork technology being what it is, the weapon ended up much larger in size than in power, but nonetheless the *Slamblasta* remains an impressive achievement in providing the Orks with a lance-armed vessel.

In the Third Armageddon War *Slamblasta* played a crucial role as part of the advance raiding parties sent ahead of the main Ork invasionary fleet, where its powerful prow lances proved particularly suited to the Orks' goal of crippling any monitoring stations, system defences or Imperial outposts on the fringes of the Armageddon system.
