SPECIAL - Like many deep-space way-stations, Tau Orbital Cities are equipped with comprehensive sensor and communication suites with a high degree of automation. They are equipped with a Tracking System. - Orcas assigned to guard an Orbital City have a base leadership of 7 and cannot squadron with other escorts.					

The Tau Kor Caste live much of their lives in zero-gravity, either as spacecraft or waystation crew, or as a resident in one of many of the Caste's own large orbital habitats. Unlike the modular deep-space way-stations used throughout Tau space, orbital habitats and cities are massive constructs usually assembled in place as permanent or semi-permanent installations in high orbit. By their very nature they are sturdier and more heavily populated than the modular way-stations designed for rapid deployment and assembly. However, as they are primarily designed for habitation, they tend to be not nearly as well defended as other orbital constructs, as demonstrated by the relatively quick destruction of the orbital facilities of Viss'el during the Damocles Gulf Crusade. As such, they tend to become important rallying points when defending against an invasion force.
